

Summary

A plectrum (1) is proposed vor striking strings whith at least two striking edges (11, 13) for striking several strings at the same time, and with at least two individual plectrums (3, 5) connected via a connection element (7, 7', 7''). This is distinguished by the fact that the connection element (7, 7', 7''), can be adapted to the index finger of the hand for holding the plectrum (1) with one hand.
